Mojidara Vivek.

Full-Stack Developer | PHP, Laravel, CodeIgniter, Node.js, React, MySQL

Ahmedabad, Gujarat, India | +91 63546 59893 | mojidaravivek23@gmail.com | linkedin.com/in/mojidara-vivek-48bb31249

PROFESSIONAL SUMMARY

Full-Stack Developer with 3.5+ years of experience designing, building and maintaining production web, desktop and SaaS applications with PHP (Laravel, CodeIgniter, Perfex CRM), Node.js/Express, React and MySQL. Built payment-to-license automation, REST APIs consumed by mobile apps, offline-first Electron POS software and multi-tenant SaaS platforms, with integrations including Stripe, PayPal, BlueSnap, QuickBooks Online and the WhatsApp Cloud API. Owns features end to end: database design, APIs, UI, testing and CI/CD deployment.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Backend: Laravel, CodeIgniter, Perfex CRM, Node.js, Express.js, FastAPI, RESTful APIs, JWT, OAuth 2.0, Webhooks, Cron Jobs

Frontend: React.js, Vite, Tailwind CSS, Bootstrap, jQuery, Alpine.js

Desktop & Mobile: Electron, Flutter, Capacitor

Databases & Data: MySQL, SQLite, Knex.js, SQLAlchemy, pandas, scikit-learn, XGBoost

Integrations: Stripe, PayPal, BlueSnap IPN, QuickBooks Online API, WhatsApp Cloud API, Firebase Cloud Messaging, Google Drive API, Claude API, Telegram Bot API, OpenStreetMap/Leaflet

DevOps & Tools: Git, GitHub Actions, Bitbucket Pipelines, GitLab CI, Linux hosting, Puppeteer, electron-builder, pytest

Concepts: Multi-Tenant SaaS, Role-Based Access Control (RBAC), Payment Gateway Integration, Software Licensing, Offline-First Apps, MVC, Agile

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Feb 2023 - Present

Software Development Company | Full-time, On-site | Ahmedabad, Gujarat, India

- **Payment-to-license automation:** Led development of a BlueSnap IPN webhook service (CodeIgniter 3, REST) that validates payment callbacks, matches customers through multi-step rules and automatically issues or renews FlexLM licenses (perpetual, subscription, network, trial) with templated emails.
- **License portal:** Contributed 300+ commits to the companion customer and admin portal (PHP, MySQL): QuickBooks Online OAuth estimates and invoices with volume discounts, renewal-reminder cron jobs, and a beta program with SSO, OTP login and S3-compatible downloads; deployed via Bitbucket Pipelines.
- **Mobile app API:** Created and maintain the REST API module on Perfex CRM 3.2 for the Sync-In co-parenting app: 90+ endpoints for custody schedules, swap approvals, events, chat, shared expenses and subscriptions, secured with JWT, SMS/email OTP and Firebase Cloud Messaging push notifications.
- **Restaurant POS:** Lead developer of an offline-first Electron + React 19 point-of-sale system on SQLite (billing, KOT, cash drawer, recipe-based inventory, tax and P&L reports, ESC/POS thermal printing over USB/Bluetooth/LAN) and its multi-tenant web SaaS edition; added device-bound license activation and V8 bytecode code protection.
- **Real-estate platform:** Contributed 400+ commits to OfficeTours, a multi-app CodeIgniter commercial real-estate marketplace: OpenStreetMap/Leaflet maps, Stripe vacancy subscriptions, tenant dashboard, agent lead flow, email templates and XML sitemaps, plus its Wicklow West landlord site.
- **SaaS products:** Built a multi-tenant school ERP (React, Node.js/Express, MySQL database-per-school) covering fees, admissions, payroll, exams, transport and NFC child check-in; co-developed a TypeScript WhatsApp GST-invoicing SaaS (Meta WhatsApp Cloud API, SSE delivery tracking, AES-256-GCM encrypted credentials).
- **Plugin licensing:** Sole developer of a Laravel 12 licensing server for a commercial Revit/BIM plugin: RSA-signed activation tokens, machine binding, rate-limited REST API, approval workflow and GitHub Actions CI/CD.
- **Also delivered:** GetGeomains registrar checkout (PayPal, Stripe, currency conversion), a checklist and checklist-category module with role-based permissions for a CodeIgniter CRM, and features for the NotifyPro document-request platform.

PROJECTS

Artha - AI-Assisted Options Trading Terminal *Python, FastAPI, React, TypeScript, XGBoost, Claude API*

NIFTY 50 options terminal with option-chain analytics (OI, PCR, max pain), blended ML (scikit-learn, XGBoost, walk-forward validation) and rule-based signals, paper trading, backtesting, Telegram alerts and encrypted Google Drive backups; 1,800+ automated tests (pytest).

Gearworks - Garage Booking & Billing (Freelance) *Node.js, TypeScript, Express, MySQL, React, Flutter*

Race-safe slot booking, invoices with parts-stock deduction, PDF delivery by email and WhatsApp, and rotating refresh tokens; web app plus native Flutter Android app.

Billora - CNC Job-Work ERP *React 19, Express 5, SQLite, Electron*

Multi-tenant ERP (database per company) for work orders, machines, inventory, client ledgers and invoicing, with device-bound license activation and web and Windows desktop builds.

Perfex CRM Custom Modules (Freelance) *PHP, CodeIgniter, MySQL*

Billing module with custom invoices, TCPDF PDFs, secure public links and WhatsApp/email delivery, plus freelancer-payment, employee-report and task-automation modules.

Daily Reminder - Desktop Assistant *Electron, React, MySQL*

Medicine-stock tracking, recurring reminders, budget charts and a daily email digest; runs in the system tray with encrypted credentials and about 50 unit tests.

EDUCATION

Master of Computer Applications (MCA) - Silver Oak University, Ahmedabad, Gujarat | 2023 - 2025

Bachelor of Computer Applications (BCA) - Som-Lalit Institute of Computer Applications, Gujarat University, Ahmedabad | 2020 - 2023
